

Walk-In Ovens

Posted: August 28, 2000

Gas-fired and electrically heated walk-in ovens from **Precision Quincy Corp.** provide temperatures to 450°F (232°C). With workspaces from 96 to 768 ft³, the ovens have adjustable air supply ducts to suit work load requirements. Standard features include digital-indicating temperature control, belt-driven air recirculation fan, welded steel construction and aluminized steel interior.
