

PRESS RELEASE

For Release: July 10, 2007

Precision Quincy Equipment Shelter Holds up to Diverse Weather Conditions

Woodstock, IL. (July 10, 2007) Our quality shelters can be found nationwide - from the top of a New York skyscraper to the remote Arizona desert. The UT shelter has steel construction for strength and resistance to corrosion, just what is needed for keeping sensitive equipment safe in any climate.

Options available on the UT shelter include electrical packages, floor systems, HVAC systems, alarm packages and architectural options. The shelter's all-welded construction provides strength and low maintenance while maintaining a light weight. Interiors are fully insulated and finished for maximum energy savings. The choice of siding includes exposed aggregate, cedar siding or brick veneer which meet any site requirements. Our shelters carry a 10 year limited warranty and all are pre-certified to meet state building certification programs.

Our utility shelter can be used for any application where equipment needs to be protected and secure. Telecommunications equipment, motor controls, switch gear, generators, security and surveillance systems- we build to fit any application.

All Precision Quincy products are proudly made here in the United States.
