

## **Precision Quincy Low-temperature walk-in ovens**

As appeared in *Composites Technology*, Dec. 2009

CompositesWorld Expo 2009 Show Coverage

Industrial heat technology manufacture Precision Quincy (Woodstock, IL) drew attendee attention to its low-temperature walk-in ovens. Designed to maintain uniform temperatures of up to 450° F/232° C throughout the oven cavity, the High-Performance EC Series ovens (available gas-fired or electric) feature a long list of standard equipment, including solid-state digital indicating set-point controllers, NEMA ball bearing motors, gasketed door openings, easily adjusted louvered duct work, heavy gauge panels and more.
